## Ultrasonic Course Enrolment Form

### APPLICANT DETAILS

PLEASE USE BLOCK LETTERS

Surname <sup>1</sup> :	
First (given) name <sup>1</sup> :	
Date of Birth (d/m/y):	
Address <sup>1</sup> :	Street:
	City/Town:
	Post code:
Email:	
Phone:	

<sup>1</sup> Name and address supplied will be used for all correspondence including course certificates

### COMPANY DETAILS (if applicable)

Company Name:	
Address <sup>1</sup> :	Street:
	City/Town:
	Post code:
Contact Name	
Contact Email:	
Phone:	

### Course(s) applied for

- UT10A – Ultrasonic Inspection (Welds) Level 1
- UT20A – Ultrasonic Inspection (Welds) Level 2
- UT20T – Ultrasonic Inspection (Thickness) Level 2

### Declaration:

I have read and understood the conditions of enrolment and pre requisite information (on pages 2 and 3) regarding the course(s) I have applied for

Applicants Signature:	Date: / /
-----------------------	-----------

C/- HERA, PO Box 76-134 Manukau City, Auckland 2241

email: eondta@ndta.org.nz

Applicants Name:

## Pre-Requisite Course Information

Depending on the training course applied for, a certain level of entry knowledge is required so that the applicant can benefit from the training time allocated for each module. The following entry level knowledge requirements are based on ISO 25107 training syllabi, ISO 9712 qualification system and the CBIP certification examinations.

Applicants shall be able to read, write and communicate orally in English at level appropriate to the training and have a near vision acuity satisfying the requirements of CBIP PRO CER – 18

### UT10A – Ultrasonic Inspection (Welds) Level 1

### UT20T – Ultrasonic Inspection (Thickness) Level 2

Course UT10A and UT20T are considered direct access and as such require no specific **Ultrasonic** prerequisite theory training. Practical (OJT) training will be required by CBIP prior to applying for their certification exams. Refer to CBIP (PRO-CER-17 and 18)

There are several fundamental basic knowledge requirements for all NDT methods that are required as a pre requisite for any theory courses and these are

- A basic knowledge of Materials Technology and a knowledge of the material processes used during manufacture. This need not be to a university level as a portion of the training is allocated to this
- Math – Algebra & Trigonometry. A basic understanding to high school level is appropriate. Pre-requisite worksheets will be sent to the applicant prior to the course and these will be reviewed prior to course commencement.

### UT20A – Ultrasonic Inspection (Welds) Level

Course UT20A is designed for Level 1 (UT welds) to progress to Level 2. As such the required training hours are in accordance with ISO 9712 and CBIP. (80 hours).

The pre requisite requirement is based on the applicant having UT Level 1 or equivalent

That is:

- Pre requisites listed above for UT10A
- Ultrasonic Level 1 theory course (40 hours minimum)
- Minimum of 3 months practical (OJT) experience

Applicants need not specifically hold a level 1 certificate but would need to verify the above requirements to the satisfaction of the NDTA training committee. Equivalent experience applied for would need to be verified by a current Level 2 or 3 (UT) certified person

**Applicants Name:**

## Equipment:

Equipment required to be supplied by the applicant will be itemised in the applicable Course Specification available for downloading on the NDTA website

[New Zealand Non Destructive Testing Association \(ndta.org.nz\)](http://ndta.org.nz)

## Conditions of enrolment:

- Acceptance for enrolment is subject to the course proceeding as scheduled.
- Satisfactory completion of these training courses does not constitute an authorisation to perform work. Certification is the responsibility of CBIP and is confirmed upon satisfactory completion of their exams.
- This course may include CBIP certification examinations (where applicable) but responsibility for this will be with the applicant to organise.
- Applicant must be familiar with the applicable course specification detailing course content and pre requisite requirements. Available for downloading on the NDTA website.
- Course conformation and placing will not be allocated until all course forms and course fees have been paid in full.

Signed applications can be either scanned and emailed to [trainingcoord@ndta.org.nz](mailto:trainingcoord@ndta.org.nz)
